Expresso Yourself: Are You Brewed For This? Is a time based coffee shop game where the player has the role of a potential barista attempting to serve as many customers as possible. Your job is to serve as many customers as you can within 60 seconds. The player is controlled through using the keyboards in order to collect coffee, serve the customers, and avoid the spills. The game has five actors which are the barista (Barista), customer (Customer), the coffee cup (CoffeeCup), coffee spill (CoffeeSpill), and the tables (Table and Counter). During the time, random coffee spills will appear at random locations, they will eventually disappear but it's important to avoid them to prevent losing points. Players will obtain one point for every customer serve and lose one point when touching the spills. When the timer ends, the player's final score will determine the hiring result. A score of 0 - 14 means the player is not hired, 15 -19 means their application is pending and has to restart, 20 -25 means they are hired, 26 or more means they are promoted to managers.

Our main actor for this game will be the **barista(Barista)** which is controlled by the player. The actor is represented by an image of a person walking around the cafe. The players will use "A", "S", "D", and "W" arrow keys in order to move around the shop. When the barista collects the coffee cups, the barista can serve the customers. It is also important for the barista to avoid spills because touching one will lose a point.

We can obtain our points through our **customers (Customer).** They represent the people waiting to receive their orders. They will wait in the small tables or the long table provided to represent that they are waiting for their order. They remain in the shop waiting for their orders to be served. When the barista touches the customer their order is complete and the player earns one point.

The **coffee cups (CoffeeCup)** will represent the coffee order that the barista needs to serve to the customers. When the barista touches the coffee, it is collected allowing the player to serve the customers.

The **coffee spills (CoffeeSpill)** represent the spills around the cafe that the barista needs to avoid. They appear in random locations throughout the game but will disappear around three seconds. If the barista touches a spill, the player will lose a point.

The **tables (Table and Counter)** represent the furniture inside the coffee shop. It includes a long counter and smaller tables. The barista collected the coffee on the counter and

served it to the customers around the smaller tables or the counter. This also helps with the environment.
